*Just
a few
Words*

*to
all of
You*

OF COURSE we wish to thank you as one of our customers or prospective customers. If you have bought from us during the past, we feel sure that the transaction has been satisfactory; if not it is not too late to rectify any mistake we have made. If you have not bought from us, all that we ask is a trial order.

YES. We are all one year older, and as time passes on more responsibility is passed down to us from Tom, Sr., and it is expected that we make it possible for us to stick to our slogan,

"THE NAME SIGNIFIES BETTER PLANTS"

We have a good stock of everything listed in this catalog, and we hope to have the privilege of serving you again this year with your requirements.

Yours truly,

TOM, JR.

P.S.—You will find our terms on the back of the order blank. Please read them before making up your order. THANKS.

Roses for Your Garden

The Rose is probably the most popular flower of today. We have continually kept abreast of the times and are growing some of the newer introductions, varieties that have been tested and tried by Rose Authorities. You need not be fearful to order any of the list offered in this catalog as they are sure to give you entire satisfaction.

To have beautiful flowers, it takes but a little labor and care of the plants, and to have them you must do a little work in the garden at different times. Do not neglect to cut the flowers, if you leave the flowers on the bushes until fully blown, cut off the seed pods that are left, this will force new shoots and of course you will have more flowers.

PLANTING

All of the roses we ship are pruned ready for you to plant in your garden. In planting roses, study the illustration below, as this picture clearly illustrates how to plant a rose bush and have it live and produce beautiful flowers. Set the plants H.T.'s and T.'s 15 inches apart, H.P.'s 24 inches apart. Dig the bed deep, and fill with plenty of well-rotted manure. Bury the collar or bud (B, see cut) about 3 inches below the surface of the soil (A). Spread the roots and work the soil amongst them, finally treading firmly. In the dry, hot season, keep the bed well watered and cultivated.

INSECTS

The most common pests are aphids or lice, green and black flies. The good general remedy is "Black Leaf 40." Directions will be found on the bottle. This remedy may be purchased from your nearest seed store.

DISEASES

For mildew, dust the leaves with powdered sulphur. For Black spot, Hammond's Copper Solution is recommended, beginning early in June and spraying every week during July and August.

There is on the market a great many insecticides for use in place of the ones mentioned above and would suggest you take the matter of bugs and diseases up with your local Seed Store.

Francis Scott Key.

All Roses listed are field grown. They have bloomed in the field before being dug—they are properly trimmed. Dug fresh for every order as it is received. We do not handle green house stock.

To guide our customers in selecting Roses, we are classing them in their respective classes:

- H.P. Hybrid Perpetual (not monthly bloomers).
- T. Hybrid Tea (monthly bloomer).
- H.T. Hybrid Tea (monthly bloomer).
- R. Rugosa (Shrub Rose).
- H.W. Hybrid Wichuriana.
- N. Noisette.

PRICES ON ALL ROSES

Postpaid to Your Door

Red Roses

Etoile de France (H.T.). One of our best red roses, a free bloomer, globular buds that unfold regularly until the bloom, unusually large is full to the center with crimson maroon petals. The stems are long and firm, a necessity in a race that is good for cutting.

Francis Scott Key (H.T.). An immense flower of bright crimson, changing to bluish crimson as the flower ages. The petals given an appearance of great ball of scarlet crimson. A fine rose for dry climates.

Gruss An Teplitz (H.T.). The wonderful red rose, flowers velvety crimson, of loose form, fair size, very fragrant. Blooms in clusters and never without flowers during the summer months

Mrs. B. R. Cant (H.T.). A beautiful freeblooming rose, the beautiful buds opening to beautiful double flowers. This variety is at its best during the late summer and early fall. A vigorous grower and disease resistant.

Red Letter Day (H.T.). Fiery scarlet, velvety and brilliant blooms, semi-single rose when fully opened, but beautiful in bud.

Crusader (H.T.). Large double blooms, rich velvety crimson, robust, free grower. Truly a beautiful rose.

A Special Rose Collection

- 1 Red Radiance (Red)
- 1 Pink Radiance (Pink)
- 1 Francis Scott Key (Dark Red)
- 1 K. A. Viktoria (White)
- 1 Luxembourg (Yellow)
- 1 Willomere (Pink)

6 Roses sure to Bloom

Red Radiance.

Pink Radiance.

RED ROSES—Continued

Red Radiance (H.T.). Considered one of the best roses grown. The flowers are large, globular and last a long time on the plant. The plant is a robust grower and practically disease resistant. We highly recommend this rose to our customers. This rose stands second among the twelve best roses of its class in America.

American Beauty (H.P.). An old favorite, well known. Large flowers, each borne on a separate stem, vivid crimson in color, fragrant.

George Dickson (H.T.). Black, velvety crimson, retaining its color well, large petals of good substance and lasting well.

Sensation (H.T.). Scarlet crimson that holds its color well. Full, well shaped flowers with petals of great size and substance. Sweetly scented. Vigorous growth, free flowering and good foliage. Blooms well late into fall.

Edward Mawley (H.T.). One of the finest of the dark crimson roses. Rewarded the gold medal of the National Rose Society of England.

Hoosier Beauty (H.T.). Splendid, dark red blooms of impeccable shape and powerful fragrance. Plant healthy but erratic in growth and not especially free flowering.

Meteor (H.T.). Deep velvety crimson; buds and blooms large, well formed, very double, borne on nice long stems with bright green foliage.

Pink Roses

Jonkeer J. L. Mock (H.T.). Clear pink, under side of petals rosy; almost silvery white, blooms of large size on long erect canes, free blooming and very double.

Killarney (H.T.). Long pointed buds, opening to flat, bright sparkling pink blooms with large petals, free blooming and vigorous grower.

Los Angeles (H.T.). Chosen by the American Rose Society as one of the twelve best roses in America. A rose of vigorous growth and produces flowers continually on good stems, color a luminous flame-pink, shaded to gold at the base of petals, fragrant, the beautiful buds opening to a mammoth bloom.

Pink Cochet (T.). Carmine pink blooms of good substance, creamy white at the center, spreading

growth, free blooming and very hardy for a Tea rose.

Mrs. Chas. Bell (H.T.). A sport of the Radiance, having all the good qualities of the parent. The blooms are globular in form, shell pink in color. We highly recommend this rose on account of its free-blooming qualities that is found in all Radiance sports.

Pink Radiance (H.T.). Similar in habit and growth as the Red Radiance and the Mrs. Charles Bell.

Willomere (H.T.). Another beautiful rose on the same order as the Los Angeles, color a shrimp pink, shading yellow to the center and toning to carmine pink towards the edges of the petals. Long coral buds on good stems.

Columbia (H.T.). A clear soft rose, deepening in color at maturity. A healthy, free-blooming rose of good shape and a strong upright grower. Suitable for cutting; fragrant.

Lady Ashtown (H.T.). Pure, deep, shining pink. A good free-growing and free-blooming rose. A general favorite because of its consistently good blooming qualities. Good cut-flower and exhibition rose.

Willomere.

Luxembourg.

Hoosier Beauty.

PINK ROSES—Continued

Frank W. Dunlop (H.T.). A brilliant rose-pink variety of clear color, good bloomer, vigorous grower. Flowers on long stiff stems. Excellent for cutting.

Rose Marie (H.T.). Clear rose-pink, flowers large, full, moderately fragrant and freely produced. It outclasses most of the older pink roses and under favorable growing conditions, is healthy, vigorous, free-flowering and a good cut-flower.

White Roses

Frau Karl Druschki (H.P.). Called Snow Queen and White American Beauty. While this rose is not in the monthly blooming class and considered a Hybrid Perpetual it will bloom from June until the flowers are cut down by the frost. Plant is a robust grower, practically free from disease, flowers a pure white, sometimes tinged when in bud with a red tinge on the top of the outside petals. A rose that should be in every garden.

K. A. Viktoria (H.T.). One of the best white roses grown today, but an old variety. Pure white and never a tinge of pink. Splendid large buds and superb full blooms, a continuous bloomer. We consider this the best all round white rose.

Mamam Cochet (T.). Creamy white, with edges flushed rose. Profuse bloomer and good grower. A good variety.

White Killarney (H.T.). Very long pointed buds of the typical Killarney rose of snowy white, open blooms beautifully formed with a few more petals than the Pink Killarney. An old favorite for cut flowers.

British Queen (H.T.). Pinkish buds and white flowers of magnificent form; fragrant. Low and branching growth. Extremely beautiful, but likely to hang its head in unfavorable weather.

Yellow Roses

Alexander Hill Gray (H.T.). Pale lemon-yellow deepening in the center of its perfectly formed fragrant flowers; moderate grower.

Etoile de Lyon (T.). Deep golden-yellow, full, deep and rich flowers; a free bloomer and fragrant.

Luxembourg (H.T.). Flowers deep orange and larger than Sunburst. Long pointed buds on fine stems for cutting, strong thrifty grower. This rose is considered by many as one of the best yellow roses grown, one we would like you to plant in your garden.

Sunburst (H.T.). One of the old roses. The color is golden orange and deep yellow, varying at different stages of the blooming period.

Lady Hillingdon (T.). Has a long slender, pointed bud of clear, deep golden yellow. A thrifty grower.

Mrs. Aaron Ward (H.T.). Delightful little buds of golden buff, opening to fully double, attractive shaped flowers of tawny gold and pink.

Duchess of Wellington (H.T.) Saffron yellow buds, outside petals stained crimson, passing to coppery

Sunburst.

YELLOW ROSES—Continued.

saffron yellow as it develops. A wonderful color and a full, well formed flower; moderately fragrant. Good for exhibition.

Gorgeous (H.T.). Deep orange yellow, flushed with pink and veined with reddish copper. Branching habit, producing its flowers freely on upright stems. Fragrant. A fine exhibition and cut-flower sort if it gets good care, to keep it strong and healthy.

Climbing Roses

Who does not like climbing roses? Their many uses make them a necessity in the flower garden. Their many colors make it possible to have a rose arbor of indescribable color. They are hardy and give blooms over a long period of time during the summer months.

Please Note.—The monthly bloomers are marked with an "M" these varieties bloom throughout the summer the same as the bush varieties.

Prices: 60c each; 3 for \$1.65; 12 for \$6.00; all charges paid.

Marechal Neil (M.) (N.) This is an old favorite which holds its place with any of the newer varieties, color a lemon yellow.

K. A. Viktoria (M.) (H.T.). Has the same good qualities as the bush variety listed under the whites.

Meteor (M.) (H.T.). Intense velvet crimson, large buds and blooms, very double and on good strong stems.

Sunburst (M.) (H.T.). The beautiful yellow rose, orange-copper, golden orange are its colors at the different stages of growth. Long stems and long pointed buds make it very desirable for cutting.

Wooten (M.) (H.T.). Velvet red, profuse bloomer, a strong and vigorous climber, blooms well formed.

Lady Ashtown (M.) (H.T.). Bright shiny pink flowers. This rose is considered the best of the climbing H.T. roses. You may depend on this variety to bloom from June until cut down by the frost.

K. A. Viktoria.

Lady Hillingdon (M.) (H.T.). Bright golden-yellow cupped flowers. A splendid everblooming climber for the South.

Columbia (M.) (H.T.). Beautiful pink roses of a medium size, a free bloomer, flowers borne on good long stems, fragrant, very desirable for cutting.

Dr. Van Fleet (H.W.). Another newer variety. Beautiful apple-blossom pink blooms, borne singly on fine stems for cutting. It blooms but once in spring. A rampart grower and it should have plenty of room.

American Beauty (H.W.). A beautiful red like the well known American Beauty bush rose, with the addition of the climbing habit. A vigorous grower and free bloomer.

Paul's Scarlet Climber (H.W.). A new edition to the red climbing roses. No other rose can compare with the brilliancy of the blooms of this rose.

Mary Wallace.

CLIMBING ROSES—Continued

Flowers of medium size, semi-double, vivid scarlet in color. A strong climber and perfectly hardy. You must see this rose to appreciate the coloring.

Silver Moon (H.W.). Clear silver white in color, flowers sometimes measuring four and one-half inches across, the centers of the flowers when open show the beautiful yellow stamens, being a very attractive feature of this rose.

Mary Wallace (H.W.). Flowers large, semi-double, bright clear rose-pink with salmon base. Blooms profusely in spring and again occasionally throughout the season. A pillar rose we highly recommend to our customers.

Climbing White Maman Cochet (T. Leedle Co. 1911). Very large, beautifully formed in bud and bloom. Pure waxy white pink shade. A sweet and continuous bloomer.

Climbing Pink Maman Cochet (T.). This climber is a good bloomer identical with the bush variety except that it climbs.

Climbing Cecil Brunner (Pol.). A sport of the dwarf bush variety of this name. Rosy pink on a rich creamy white ground, shaded light salmon. A beauty.

Climbing Wootton (H.T.) (Butler 1899). Velvet red; profuse bloomer. A strong vigorous climber. Beautiful blooms well formed.

Climbing Perle Des Jardins (T.). Rich and beautiful shade of clear golden yellow; flowers large, globular formed, richly perfumed.

Silver Moon (H.W.). The flowers run four and one-half inches in diameter; clear silver-white in color; petals of great substance and beautifully cupped. The center is filled with beautiful bright yellow stamens, a very attractive feature. The plant literally covers itself with clematis-like flowers borne on long strong stems, 12 to 18 inches long and delicate. Blooms for a long time in the Spring.

Climbing Mrs. Aaron Ward (H.T.). A climbing sport of Mrs. Aaron Ward. Flowers identically with bush variety. Vigorous and free blooming.

Climbing Madam Abel Chataney (H.T.). A very desirable pink climber. Just like the bush Rose of this variety, except that it is a vigorous climber.

American Pillar (H.W.). Large, flat, single flowers of brilliant crimson pink, enlivened with a large white center and golden stamens. Flowers are borne in tremendous quantities on extremely long canes. Like many of its shade, it burns in hot sun, but is unequalled for brilliancy when at its best. Rambler type. Late.

Climbing Mrs. George Shawyer (H.T.). Long, slender, finely formed buds, opening very large perfectly formed flowers of clear, brilliant rose.

Dr. Van Fleet.

FOR CONSIDERATION

THE NAME DODD signifies quality. All plants sent out by us are what they should be, vigorous plants that will grow and give you satisfaction. We offer plants that have been tried out under practically all conditions, and we offer our products to you with assurance that you will be satisfied with results.

Coniferous Evergreens

The beauty and dignity of Evergreens have enormously contributed to the popularity of good home planting. We list herewith varied varieties for the different uses in landscape planting. Evergreens stand shearing well, some varieties have to be sheared to keep them in bounds. When you once make a planting of evergreens, it will last for years with but a little care.

We have varieties suitable for individual and group plantings, for foundation planting, for terraces, in the sun or shade.

It will be a pleasure to have you consult us about your planting problems. To enable you to pick out the different types we are designating them by numbers.

KEY TO DIFFERENT TYPES

Type 1—Tall grower, narrow or columnar form. Fine for planting as individual specimens, or between the windows in a foundation planting.

Cypressus (Cypress)

C. Lawsoniana (Lawson's Blue Cypress) 2. A beautiful type of Cypress, making it distinct from all other varieties on account of its blue coloring.

	Each	For 3
12 to 18 in., Baby size, P. R., postpaid....	\$.50	\$1.40
18 to 24 in. B. & B., express collect.....	1.50	4.00
2 to 3 ft., B. & B., express collect.....	2.50	6.75

C. Sempervirens (Italian Cypress) 1. The stately tall-growing columnar evergreen, dark green color.

	Each	For 3
2 to 3 ft., B. & B., express collect.....	\$1.50	\$4.00
3 to 4 ft., B. & B., express collect.....	2.50	6.75

Cedars

Cedrus Deodara (Indian Cedar) T. G. The most stately and best of all cedars for Southern planting. Silvery green foliage.

	Each	For 3
10 to 15 in., Baby size, P. R., postpaid....	\$.55	\$1.50
2 to 3 ft., B. & B., express collect.....	2.00	5.40
3 to 4 ft., B. & B., express collect.....	2.50	6.75

Chamaecyparis (Retinospora)

JAPANESE CYPRESS

R. Plumosa (Plume Cypress) 2. Soft feathery foliage, dark green, makes an excellent plant when closely sheared.

R. Plumosa Aurea (Golden Plume Cypress) 2. Same as the variety above, excepting this variety has a yellow foliage.

R. Squarrosa Veitchi (Silver Cypress) 2. Very fine soft texture foliage of light silvery blue-green. Beautiful and desirable, stands shearing well, and helps to keep it from becoming straggly.

C. Pisifera Filifera (Thread Retinospora) 2. A most ornamental tree, with bright green, string-like, drooping foliage which it retains at all seasons of the year. Best of all, it thrives in more or less shady places.

Prices for All Retinosporas Listed

	Each	For 3
10 to 15 in., Baby size, P. R., postpaid....	\$.50	\$1.40
2 to 3 ft., B. & B., express collect.....	2.00	5.40

Type 2—Broad and conical, may be used as a background in foundation planting, the smaller sizes can be used anywhere in a group planting.

Type 3—Globular form, suitable where low growing evergreens are needed.

Type 4—Spreading form, may be used anywhere in foundation plantings.

Type 5—Squatty type, spreading form, fine for rock gardens, terraces, or front space in foundation plantings.

T. G.—Tall growing Evergreens, for specimen planting only.

P. R. means puddled roots. The roots are covered with a thick coating of mud to help conserve moisture in transit. When roots are puddled they can be sent by mail.

B. & B. means the evergreens are dug with a ball of earth, wrapped in burlap. It is necessary to do this on the larger sizes.

Cunninghamia

Cunninghamia Lancelota (Chinese Fir). A very decorative Conifer of warmer temperate regions. Distinctive, unusual and desirable. Prefers a half-shaded position and sandy and loamy, humid soil.

	Each	For 3
10 to 15 in., Baby size, P. R., postpaid....	\$.50	\$1.40
2 to 3 ft., B. & B., express collect.....	1.50	4.00

Retinospora Plumosa Aurea.

Juniperus (Junipers)

J. Argentea (Variegated Chinese Juniper) 1. A beautiful Juniper, upright in growth, light green in color with tufts of light yellowish white foliage interspersed among the green.

	Each	For 3
6 to 8 in., Baby size, P. R., postpaid.....	\$.50	\$1.40
10 to 15 in., B. & B., express collect.....	1.50	4.00
15 to 18 in., B. & B., express collect.....	2.25	6.00

J. Excelsa Stricta (Spiny Greek Juniper) 2. Dense, compact grower. Foliage is made up of very small, sharp, needle-like leaves of bluish steel-gray green hue.

	Each	For 3
10 to 12 in., Baby size, P. R., postpaid.....	\$.50	\$1.40
12 to 15 in., B. & B., express collect.....	1.50	4.00
18 to 24 in., B. & B., express collect.....	2.50	6.75

J. Communis Kiyonoi Columnaris 1. A new introduction originating in Southern Alabama. A beautiful type of the common juniper, but of much better form and color. Being a tall growing variety, we recommend it being used in the back of a foundation planting.

	Each	For 3
8 to 10 in., Baby size, P. R., postpaid.....	\$.60	\$1.65

J. Virginiana Glauca (Virginia Blue Cedar) 1. A form of the Virginia Red Cedar, but the foliage being a silvery blue in color. Valuable for color accent.

	Each	For 3
12 to 18 in., Baby size, P. R., postpaid.....	\$1.00	\$2.70
2 to 3 ft., B. & B., express collect.....	3.00	8.10
3 to 4 ft., B. & B., express collect.....	4.00	10.80

J. Chinensis Pfitzeriana (Pfitzer's Juniper) 4. One of the best and well known Junipers, used extensively in landscape plantings, seems to be absolutely hardy, dark green foliage that holds throughout the entire year.

	Each	For 3
12 to 15 in., Baby size, P. R., postpaid....	\$.60	\$1.40
15 to 18 in. B. & B., express collect.....	2.00	5.40
18 to 24 in., B. & B., express collect.....	3.50	9.50

J. Japonica Sylvestris (Japanese Juniper Pyramidal Type) 1. Bright green foliage, adapted to a great range of climate, temperature and soil conditions, perfectly hardy.

	Each	For 3
12 to 15 in., Baby size, P. R., postpaid....	\$.60	\$1.65
2 to 3 ft., B. & B., express collect.....	3.00	8.00

Juniper Excelsa Stricta.

Podocarpus (Japan Yew)

P. Chinensis 1. A beautiful evergreen, upright in growth, light green leaves when the plants are young turning to a dark green as the plant matures. It is excellent for specimen planting, or it may be used as a hedge or for screens. Hardy.

	Each	For 3
12 to 18 in., Baby size, P. R., postpaid....	\$.35	\$.95
18 to 24 in., B. & B., express collect.....	1.50	4.00
2 to 3 ft., B. & B., express collect.....	2.00	5.40

Pfitzer's Juniper.

It is not expected that a plant set out carelessly will live. All plant-life depends upon nature to do its share towards having enough moisture.

In planting evergreens don't forget to use enough water, but don't stop after the first watering—it must be continued until the plant has made a start, even then during a hot dry spell consistent watering will help the plants hold their beautiful colorings.

DON'T BE AFRAID TO USE WATER.

Baker's Arborvitae.

Thuja Biota (Arborvitae)

Arborvitae like the Junipers have always had a prominent place in the beautification of the American home. No home is complete without being planted and it seems no home is properly planted unless some Arborvitae are used in the plantings.

The variety is designated by a number after the name under the key that appears on page 2. This will help you materially in selecting the proper va-

Berkman's Golden Arborvitae.

riety for the proper place. Should you wish, we will be pleased to have you write us about your planting troubles. We will be pleased to furnish you with the necessary information.

Chinese Types (Thuja Biota)

B. Bakeri (Bakers Arborvitae) 1. One of the newer varieties in this class of evergreens. A beautiful pyramidal grower, yellowish green foliage, vigorous grower with intense coloring.

	Each	For 3
15 to 18 in., Baby size, P. R., postpaid.....	\$.50	\$1.40
2 to 3 ft., B. & B., express collect.....	1.50	4.00
3 to 4 ft., B. & B., express collect.....	2.00	5.40

Rosedale Arborvitae.

B. Aurea Nana (Berkman's Golden Arborvitae) 3. A beautiful slow-growing evergreen, a golden yellow color, compact and bushy, always beautiful from the smallest of plants until maturity. An evergreen we highly recommend and use a great deal in our landscape plantings.

	Each	For 3
8 to 12 in., Baby size, P. R., postpaid.....	\$.50	\$1.40
12 to 18 in., B. & B., express collect.....	1.00	2.70
18 to 24 in., B. & B., express collect.....	1.50	4.00

B. Orientalis (Chinese Arborvitae) 1. The common variety of Chinese Arborvitae, pale golden green in color, thrifty grower and make fine evergreens for screens and mass planting, may be used in the back of a foundation planting, but not recommended for this use.

	Each	For 3
8 to 12 in., Baby size, P. R., postpaid.....	\$.35	\$.95
2 to 3 ft., B. & B., express collect.....	1.00	2.70
3 to 5 ft., B. & B., express collect.....	1.50	4.00

Aurea Conspicua (Goldspire Arborvitae) 1. Of compact erect and symmetrical habit. Foliage intense gold, some of its branches being of solid metallic tint, others suffused with green.

	Each	For 3
15 to 18 in., Baby size, P. R., postpaid.....	\$.60	\$1.65
2 to 3 ft., B. & B., express collect.....	2.50	6.75

Bonita Arborvitae.

*I*N PLANTING or Landscaping your grounds, do not over-plant. Bear in mind that the plants you plant must have room to develop. Do not use the wrong material — you had better not plant. We list plants for all uses. It will not cost you anything to consult us before you make that planting.

B. Orientalis Beverleyensis (Beverly Golden Arborvitae) 1. An excellent variety for use in formal plantings, it makes an excellent showing when planted as individual specimens. Color, a bright green, overcast with golden yellow.

Each	For 3
15 to 18 in., Baby size, P. R., postpaid....\$.50	\$1.40
2 to 3 ft., B. & B., express collect.....	2.00 5.40

B. Bonita (Bonita Arborvitae) 3. An evergreen for the finest plantings, a slow grower, every spray, being in exact position as if placed and fastened, rich in color. A very desirable variety and especially where space is limited.

Each	For 3
8 to 12 in., Baby size, P. R., postpaid....\$.50	\$1.40
12 to 18 in., B. & B., express collect.....	1.75 4.75

B. Rosedale (Rosedale Arborvitae) 2. This variety is different from any other variety of Arborvitae. Its bluish gray feathery-like foliage make it an outstanding variety. On account of its symmetrical growth, it may be used for specimen planting, or the smaller plants in urns or tubs.

Each	For 3
12 to 15 in., Baby size, P. R., postpaid....\$.40	\$1.00
18 to 24 in., B. & B., express collect.....	1.00 2.70

Goldspire Arborvitae.

Abelia Grandiflora.

Dodd's Broad-Leaved Evergreens

Broad-Leaved Evergreens are the South's greatest floral treasure. Many varieties lend beauty with bloom and wonderful evergreen foliage.

Adapted to the many varieties of soil found throughout the South, these varieties of plants will thrive and do well. They are excellent for mass planting, for foundation planting, for screens, for use with evergreens. Varieties have to be chosen as to their adaptation. They add color and striking appearance to the landscape.

This class of plants require but little or no pruning whatever. It is necessary to do a little clipping to keep them in shape where a variety is apt to send out long shoots, otherwise they should be left entirely alone.

We list in this section of the catalog the varieties that have been tested out as to their qualities and highly recommended them to our customers.

Should you wish any information as to what to plant, do not hesitate to write.

P. R. means roots are puddled in mud.

B. & B. means that the plants are dug with a ball of earth, wrapped in burlap.

Abelia

Abelia Grandiflora (*Abelia Rupestris*). The South's beautiful shrub, as well known as the Crepe Myrtles in practically all plantings Abelia is used. From May until frost the graceful arching branches are covered with clusters of tubular-shaped white flowers, tinged with pink, perfectly hardy in the South, very useful for planting singly or in groups. By pinching the long shoots thruout the summer this plant will grow very dense and compact.

	Each	For 3
10 to 15 in., Baby size, P. R., postpaid....	\$.25	\$.70
18 to 24 in., Baby size, P. R., postpaid....	.50	1.40
2 to 3 ft., B. & B., express collect.....	1.00	2.70

WE LIST in our Broad-Leaved Evergreen section plants that will give you blooms and berries the entire year. There is no need to be without one or the other in making any kind of planting. LET US HELP YOU PLAN IT OUT.

Azalea.

Azalea

Azalea Hinodigiri (Dwarf Japanese Azalea). A dwarf compact growing type with bright carmine flowers produced in profusion in early spring. The blooms almost entirely hides the foliage presenting a blaze of color lasting about five weeks, very hardy.

	Each	For 3
4 to 6 in., Baby size, B. & B., postpaid.....	\$.75	\$2.00
8 to 10 in., B. & B., express collect.....	1.50	4.00
10 to 12 in., B. & B., express collect.....	2.00	5.40

Azalea Indica (Indian Azalea). We offer many shades of this type—Crimson, Scarlet, Salmon, White and the Famous Mobile which is Watermelon Red. This type of Azaleas gives a wealth of color and are perfectly hardy.

AZALEAS INDICA

	Each	For 3
5 to 7 in., B. & B., postpaid.....	\$.50	\$1.40
7 to 10 in., B. & B., express collect.....	1.25	3.40
10 to 12 in., B. & B., light express collect	1.50	4.00
12 to 15 in., B. & B., light express collect	2.50	6.75
15 to 18 in., B. & B., light express collect	3.50	9.60
15 to 18 in., B. & B., heavy express col't	4.50	12.20

Ligustrum Lucidum.

For Gardening Success

THE best seeds and plants will not produce good results if grown in an impoverished soil. Be sure your plants get all the nourishment they need for full growth and greatest beauty. Feed them with Vigoro, the complete, scientifically balanced plant food.

Vigoro produces thick, velvety-green lawns with deep extensive roots; helps choke out weeds; and increases humus in the soil.

It makes flowers larger and more beautiful; produces early delicious vegetables, luxuriant shrubbery, and healthy, full-foliaged trees. Vigoro is clean, odorless, and easy to use. It's

economical, too! Costs only 10¢ to 20¢ for every 100 square feet.

Order enough Vigoro for everything you grow.

1
Read simple
directions

2
Apply Vigoro
evenly

3
Wet down thoroughly

VIGORO

Complete plant food

A product of Swift & Company

For Lawns, Gardens, Flowers, Shrubby, and Trees

English Laurel.

Ligustrum (Privet)

Ligustrum Japonicum (Japanese Privet). A vigorous growing type, foliage dark shiny green. Panicles of white fragrant flowers borne in spring followed with purplish black berries. Used a great deal for mass plantings and screens.

Ligustrum Pyramidalis. Leaves are rather pointed, thick and glossy and of a decided upright habit of growth. For corners of houses, between windows and for background this plant is indispensable.

Ligustrum Lucidum. A compact, graceful plant with dark green, glossy foliage and white flowers, which are rather inconspicuous. An ideal foliage plant, evergreen and highly desirable for foundation planting.

Prices on Ligustrums Listed
